

How It's Made

The challenge with CBD has always been getting the particles small enough to be properly sterilized.

By pioneering *new technology*, we're able to reduce the CBD particles to a level small enough to pass through a sterile filter for a *safe product*.

Patent Pending Technology

Atomize the CBD particle to reduce it to the size of a pico, small enough to be sterilized and more readily absorbed by the body.

Sterile Filtration Process

Pass the Pico IV solution through a sterile filtration process to remove any contaminants and leave only sterile CBD.

Rigorous 3rd Party Testing 100% Reliable. 100% Transparent.

Test for purity, potency, and sterility. Comprehensive testing includes checking for:

All third-party test reports are published on PicoIV.com

Every product is third-party tested for purity and potency.

BENEFITS OF CBD

CBD **naturally** helps support your body's homeostasis and can aid in providing **relief** for certain day to day issues.

Health

Naturally supports overall health & wellness in your body.

Sleep

Helps promote a healthy sleep cycle and prepare your body for rest.

Anxiousness

Helps soothe occasional feelings of stress or anxiety that we feel in our day to day lives.

Aches

May offer relief to occasional aches and pains due to overexertion or a strong workout.

Mood

Many find CBD to help promote a feeling of relaxation and calm.

We have additional answers to common **FAQs**, **test results**, and more **information** regarding this breakthrough product.

THE WORLD'S FIRST & **ONLY** STERILE CBD FOR IV INFUSIONS

Unique Benefits

Pico IV gives your body peak access to the many benefits that may include supporting overall health and wellbeing, and many other day-to-day issues.

Increased Absorption

Because the CBD is administered through an IV, your body is able to absorb nearly 100% of the dose, meaning you get more of the benefits in less time.

Natural, Safe, and Pure

Our CBD is naturally extracted from the hemp plant and third-party tested to make sure it is free from any contaminants and is safe to use in IV form.

About

CBD

also known as cannabidiol, is one of the many cannabinoids, or compounds, found naturally in the hemp plant.

★ *It is also one of the most popular cannabinoids on the market.*

Here are a few facts about CBD:

 CBD IS **NOT** PSYCHOACTIVE

which means it can't get you high and is completely legal in the US.

It's a completely natural ingredient extracted from hemp grown in the US.

Our CBD contains **ZERO** THC.

It interacts with your body's endocannabinoid system, a cell-signaling system within your body that helps regulate many of its natural functions.

Many users report that it helps support their body's natural homeostasis.

It's been a popular supplement used in tinctures, capsules, ointments, and now IV infusions.

It was first isolated and discovered in 1940.

Dosing Pico IV

Please review dosage recommendations in its entirety

Directions

When administered, we recommend starting with 40 drips per minute for 5 minutes, and then 80 dpm until bag IV solution bag is empty.

Dilute one 6.25ml (25mg) into 250ml+ infusion fluid.

Do not exceed one dose for first-time users. Do not increase dosage by more than 6.25ml (25mg) per session after first dose.

Administer at 40 drip per minute for 5 mins then increase to no more than 80 dpm

 25 mg
CBD
1 dose

 =  = 200 mg
CBD
8 doses

For first time users, we recommend providers start with *no more* than one 6.25ml (25mg) dose. This allows providers to gauge the sensitivity to CBD or the potential to experience chills.* This is also a good option for more day-to-day issues like overall health and well-being.

Single Dose

25mg
CBD

For first time users and overall health and wellbeing.

 6.25 ml
Pico IV into 100-250ml saline

 40 dpm
Start drip for 5 minutes

 80 dpm
Max increase until empty

For more pronounced concerns, providers may increase the dose by no more than 6.25ml (25mg) per visit to establish individual tolerance for each user.

2-3 Doses

50-75mg
CBD

For more pronounced concerns

 12-18 ml
Pico IV into 100-250ml saline

 40 dpm
Start drip for 5 minutes

 80 dpm
Max increase until empty

**When combined with other agents such as vitamins or maintenance fluid, a high ml bag is recommended.*

Why Pico IV?

CBD IV Infusion is transforming the CBD industry and the way you can experience the benefits of CBD.

Maximum Absorption

Most methods of CBD usage have varying levels of absorption, whether that be ingestion, topical and sublingual. While it is still enough for you to experience the benefits, your body will only absorb a percentage of the total dose.

By utilizing water soluble technology and a CBD intravenous (IV) solution, users can experience nearly 100% absorption of the CBD extract.

Completely Sterile

The challenge with CBD has always been getting the particles small enough to be properly sterilized.

By pioneering new technology, we're able to reduce the CBD particles to a level small enough to pass through a sterile filter for a safe and sterile IV Infusion.

Combination IV Infusions

While CBD IV Infusion can be used on its own to experience the benefits, it can also be combined with various other IV infusions to create a more full effect.

Speak with your provider today about what combination might be right for you.
